Bem, primeiro, o que a Mozilla quer dizer com "Saúde da Internet"?

A Internet é um ecossistema.

O ecossistema da Internet é um recurso público global que pertence a todos nós igualmente.

**Ok, o que é exatamente o
"Internet Health Report"?**

É uma iniciativa de **código aberto** para **documentar** e **explicar** o que está acontecendo com a saúde da Internet.

Web literacy

Why don't more women code?

@kevin zawacki

Lauren, an 11-year-old girl in Calgary, recently launched her own robotics company. Latasia 12, built a sobering webpage that seeks to curb violence against indigenous women in Canada.

In a world where males routinely dominate STEM (science, technology, engineering, and mathematics) fields and computer science programs, Lauren and Latasia are exceptions to the status quo. The two have something else in common, as well: Each is an alumna of Ladies Learning Code.

Canadian nonprofit Ladies Learning Code (LLC) is an organization working to level the playing field for women online. Digital inclusion data often dismays and disheartens: In nearly all countries, the percentage of men using the Internet outpaces the percentage of women using the Internet. From Japan and Germany to Morocco and Turkey, more men than women are online.

Ladies Learning Code is seeking change. With 29

Então, por que a Mozilla se preocupa com isso? Por que eu deveria me importar?

A vida on-line é a vida real.

Nós podemos tornar a Internet mais saudável.

O que eu posso fazer?

- Ler, baixar e compartilhar o relatório
- Mensure a saúde da Internet na sua região? Discuta com as pessoas ao seu redor
- Envolver-se com a pesquisa e as pessoas no relatório
- Contribua para o relatório de 2019
